ABOUT

I'M A MERN STACK WEB DEVELOPER AND PROGRAMMER WANT OBTAIN A POSITION THAT WILL ENABLE TO USE MY TECHNICAL KNOWLEDGE AND SKILLS TO BENEFIT THE COMPANY AND ENSURE MY PERSONAL AND PROFESSIONAL GROWTH

TRAINING

WALKOVER UNIVERSITY

march 2022-june 2022

- A 6 week industrial program where i learn about git, dbms, web services
- At the end as completion we have to submit a project on the topic they have given in teams Our Topic was to make a web app which can manage and store user data in form of tables with full ui
- In this project i have handled the frontend work for which i have used reactjs After project submission soon i got the completion certificate

PROJECTS

CODEIAL | REACT PROJECT

- It is a WebApp which serves the following purposes:
- The user can create his/her account using local auth.
- Users can create a post. Users can comment, like on other posts.
- Users can chat with other users in group.
- The Backend was made on Node js and Frontend Fetch all info from backend using REST APIs
- Technologies used: React, Nodejs, MongoDB, Sockets.IO
- Web:// [Codeial](#)
- Github:// [Codeial](#)

GIVING AND SHARING TRUST | NODE PROJECT | TEAM PROJECT

- We decided to start the organisation where we can do welfare of underprivileged people whenever we get time. As part of this I can start a project (for ex. Donating Food) as an admin and then it will be uploaded in the website and those who want to volunteer us they can also join us by filling the form. And if someone wants to donate, they can also donate in the donate section.
- There is a special route (/admin) for Admin access with USERNAME : `GSTADMIN`, PASSWORD : `GST1234`
- Technologies used - Nodejs, MongoDB, Expressjs, Razorpay (for payment gateway)
- Web:// [GST](#)
- Github:// [GST github](#)

MOVIE APP | REACT LEARNING PROJECT | INDIVIDUAL PROJECT

- It's a simple web app to organise list of movie user watch and to mark them as favourite or unfavourite including searching of movie across internet using OMDB api
- Technologies used - React, Redux
- Web:// [MOVIEAPP](#)
- Github:// [MOVIEAPP github](#)
